Product Comments

PS5250

I purchased these speakers at Daytona Bike Week, and was told that they would be the perfect replacement for the stock speakers in my FLHX. This couldn't more true. There is no noticable distortion when turning the volume to 80 or 90 %. They sound great at 75 MPH, unlike the stock units. I highly recomend this product for an inexpensive upgrade to a stock stereo on a Harley Touring bike.

PS5250 COAXIAL
